DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities:

- In claim 1, line 8, the recitation “a connection” should be changed to --a connection point-- if it is the connecting point defined in line 14;

- In claim 1, line 10, the recitation “two or more filters is or are” should be changed to --two or more filters are--;

- In claim 1, line 11, “a substrate” should be changed to --the substrate--if it is the substrate defined in line 2;

- In claim 1, line 15, the recitation “the filter or filters is or are provided” should be changed to --the filters are provided-- because, in line 10, two or more filters are defined;

- In claim 1, line 18, change “the connection” to --the connection point--;

- In claim 1, the last line, change “a connecting point” to --the connection point--.

Appropriate correction is required.

2. This application is in condition for allowance except for the following formal matters:

The objections of the claim described above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. Claims 1-5 are allowed.
4. Claim 1 recites an antenna arrangement having a flat dipole formed on a substrate, the dipole comprising the end areas of the dipole halves electrically connected to the connecting lines, two amplifiers connected to the connecting lines, the outputs of two amplifiers connected to the two inputs of a transformer, a low-pass filter connected between the outputs of the two amplifiers and the connecting point, and a band-stop filter connected between the outputs of the two amplifiers and the connecting point.

None of the prior arts shows or suggests this flat dipole.
